

**Land Disturbance Permit – Erosion and Sediment Control Plan
Disturbance from 5,000 SF to Less Than One Acre**

Applicant Information		
Name	Address	City, State, Zip
Home Phone	Mobile Phone	E-mail

Landowner Information		
Name	Address	City, State, Zip
Home Phone	Mobile Phone	E-mail

Land Information		
Parcel ID	Address of property if different than Owner Address	Acres

Project Information		
Description of construction or land disturbance activity	Proposed project Schedule	Estimated Area to be disturbed (SF)

Erosion and Sediment Controls [Check all that apply]

1. **Soil stabilization** [All areas disturbed must be permanently revegetated after completion of building or site preparation]
 - Mulch
 - Seed and Mulch
 - Sod
 - Erosion Control blanket
 - Other
2. **Sediment Controls**
 - Fiber Roll
 - Silt fence
 - Filler Berm
 - Other
 - Not applicable – explain why
3. **Entrance / Exit Stabilization** when entering onto paved roads (Daily must assure roads are clean)
 - Stone pad
 - Mud mat
 - Paved driveway
 - Other. Explain

4. **Dust control.** If necessary, describe actions to be taken.

Erosion and Sediment Control Site Plan

On the following page or on drawing generated separately please identify the following on the site map:

1. Property boundaries
2. Project Boundaries
3. Existing roads or access way to property
4. Direction of flow
5. Existing and proposed structures
6. Proposed fill or stockpiles
7. Identification of all stormwater drainage ways (ditches) and or public waters located on and within 110' feet of the subject property's boundaries with the distance indicated;
8. Identification of all wetlands
9. Delineation of all areas to be graded or excavated, and the limits of land disturbing activities;
10. Identification of measures to be utilized to control erosion and sedimentation within and from the subject property during the project activity as required herein;
11. Identification of the location of soil storage or stock pile areas to be utilized;
12. Identification of all measures to be utilized to protect neighboring property, water bodies, and wetlands
13. Identification, use and maintenance plan of Best management Practices for temporary erosion and sedimentation control as recommended by the MPCA stormwater manual.

_____ Date: _____

Owner Signature

_____ Date _____

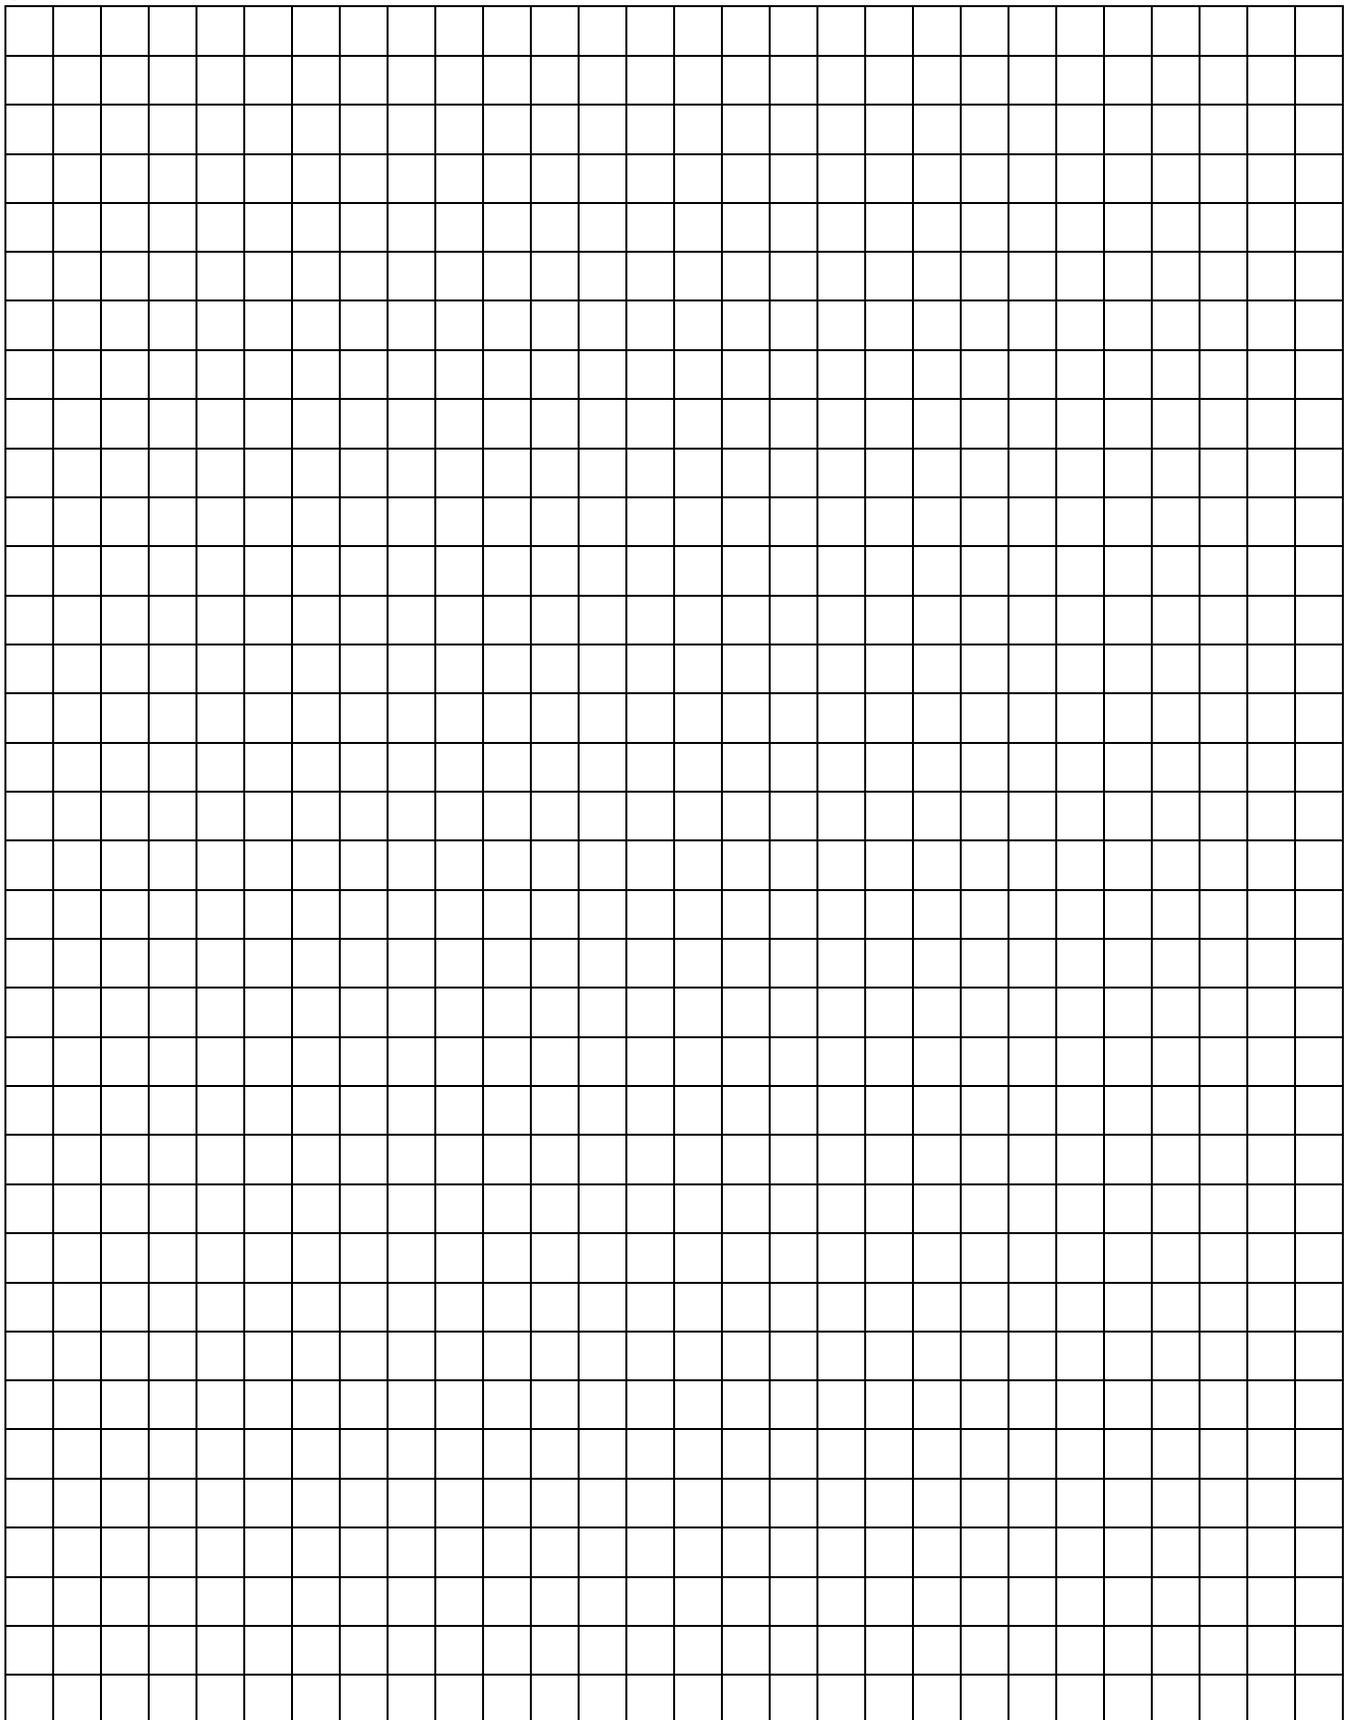

(If applicant is not the landowner both parties must sign this form, or a signed statement from the landowner indicating the applicant is authorized to act on the landowner's behalf must be submitted)

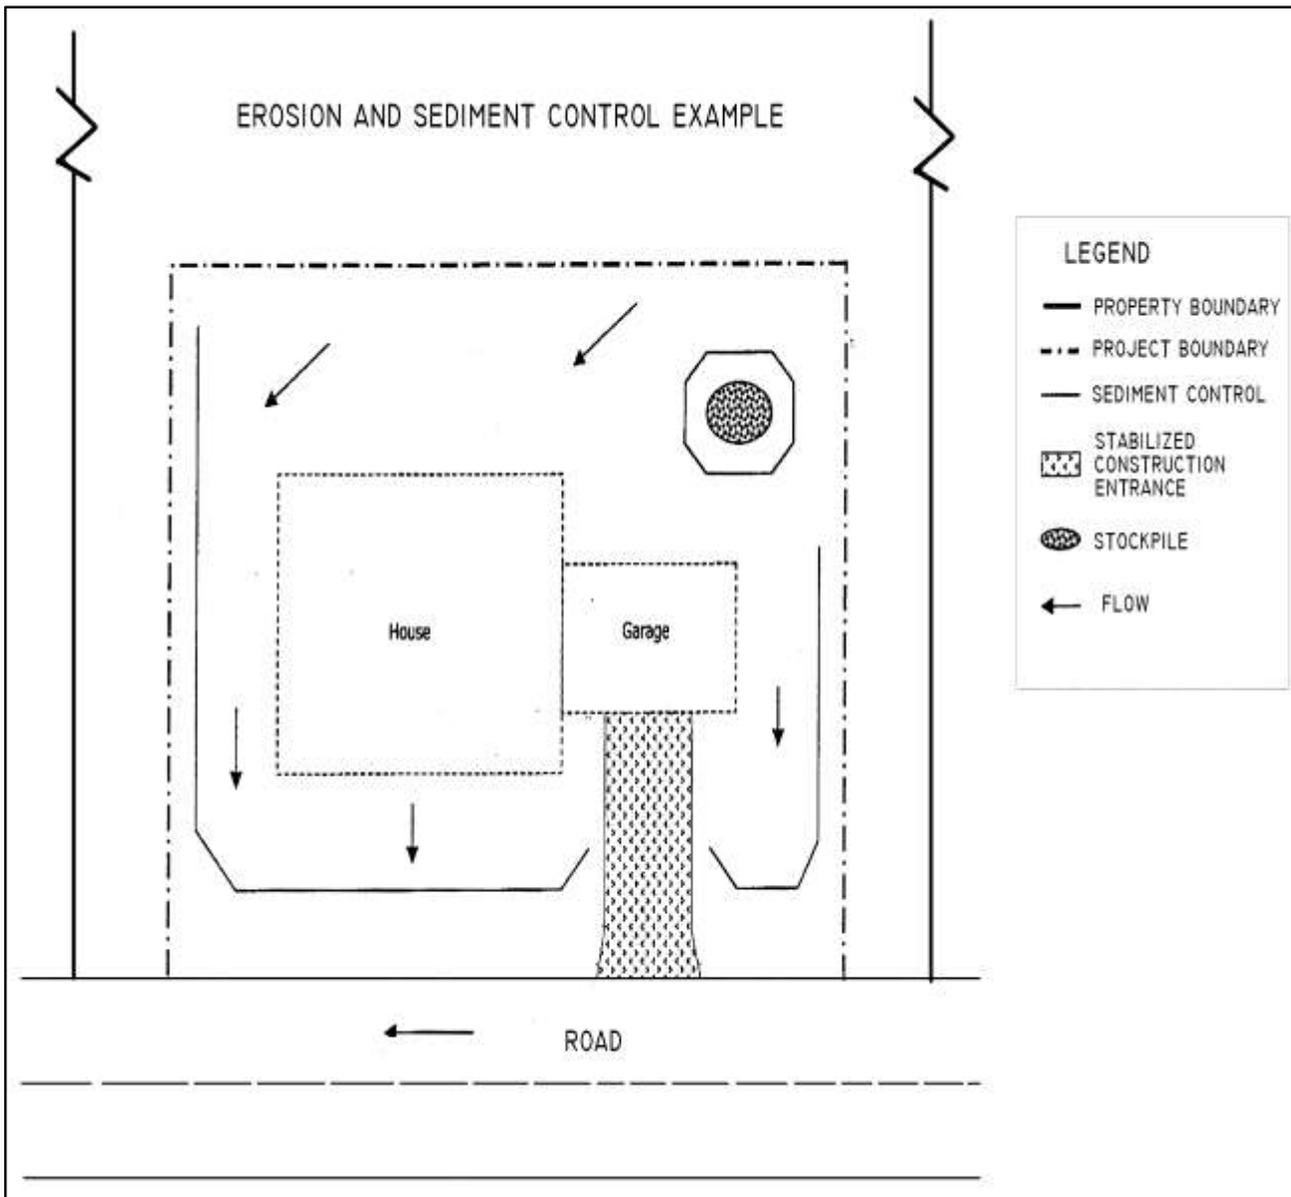

Office Use Only

Date Received _____

Fee Received _____

SITE MAP

NOTES

1. Sediment control must be installed on all down gradient perimeters before land disturbing activities begin and must be maintained throughout construction.
2. Exposed must be stabilized at completion of project.
3. Controls, where required, must be installed at the construction entrance/exit to minimize offsite tracking. Any material tracked onto roads must be removed within 24 hours.
4. Sediment controls must be installed around stockpiles, and stockpiles must not be placed on road right-of-ways.

Erosion and sediment control plans may be required most project sites where a land use permit is required. This is only a sample plan and is not intended to address every possible situation. Additional or modified practices may be required on some sites
